Applications & Tools	Eclipse, Browser-stack, Jira, Gitlab, GitHub.
Database	SQL.
Scripting Languages	Java, HTML, JavaScript
Operating System	Android, IOS, Windows, Mac.

PROJECTS:

Project #1
Holcim Plus - (Web and Mobile)
Holcim Plus is a digital B2B platform developed for Holcim's commercial customers to manage their cement orders, track deliveries, manage accounts, and access product documents. The platform aims to enhance the user experience for contractors, distributors, and procurement professionals across global markets, offering self-service capabilities via web and mobile apps.

As a QA Engineer on the Holcim Plus project, I was responsible for end-to-end manual testing across both web and mobile interfaces, ensuring the application met quality standards, was functionally stable, and user-friendly across multiple environments and devices.

Project #2
Beldara – Global B2B E-Commerce Platform (Web and Mobile)
Beldara.com is a global B2B e-commerce platform that connects suppliers and buyers across various industries like apparel, electronics, industrial goods, agriculture, and more. The platform enables businesses to create profiles, list products, manage inquiries, generate leads, and make secure transactions through web and mobile channels.

As a QA Engineer, I was part of the core quality team responsible for ensuring seamless user experience, high system reliability, and secure transactions across the Beldara platform. My work covered testing of the core website functionalities, admin dashboard, mobile

responsiveness, and seller-buyer communication workflows.

Project #3
Landmark Insurance Brokers (PolicyBoss.Com, Insurance Domain) Support & Jr. Software Tester (Web and Mobile)
PolicyBoss.com is Landmark's flagship platform that allows users to compare insurance products, calculate premiums, and purchase policies online. The platform integrates with 40+ insurance partners and supports a full customer journey from quote generation to policy issuance and renewals.

As a QA Engineer, I was responsible for ensuring the functional accuracy, stability, and performance of key user journeys and internal tools.

RESPONSIBILITIES:

- Analyzed and understood requirement specifications to develop detailed test scenarios, test cases, and test data.
- Performed functional, UI, regression, and cross-browser testing across multiple platforms.
- Conducted thorough manual testing of web and mobile applications to ensure software quality and usability.
- Executed test cases and logged defects using tools like JIRA, tracking and managing them through their lifecycle.
- Validated APIs using Postman and verified responses against expected outputs.
- Performed database validation using DBeaver and DB Browser for SQLite to ensure data integrity.
- Utilized Browser Stack for remote cross-platform and cross-browser testing.
- Collaborated closely with developers, product managers, and designers in Agile/Scrum environments.
- Participated in daily stand-ups, sprint planning, and retrospectives to align QA efforts with development goals.
- Ensured test documentation was maintained, including test plans, test reports, and bug reports.
- Contributed to process improvements and quality assurance best practices within the QA team.

EDUCATION:

Degree	College / University
Bachelor of **Commerce** (2016)	N G Acharya & D K Marathe College Of Arts Science & Commerce
HSC (2012)	Maharashtra State board
SSC (2010)	Maharashtra State board
